

1 **What I claim is:**

2 1. A bed pad wedge system including a wedge installed at each lateral edge
3 of a fitted mattress pad, as a guard, comprising a fitted mattress pad enclosing a
4 mattress and fastened thereto, said mattress pad including two pockets each fastened
5 to said mattress pad at each lateral edge of said mattress pad, said pockets are
6 installed on the underside of said mattress pad facing an outer surface of said mattress
7 pad, said pockets are each formed by a first seam located at an edge of said mattress
8 pad and a second seam located inside of said mattress pad and away from said first
9 seam at the edge of said mattress, a foam rubber wedge is located in each of said
10 pockets.

11 2. The bed pad wedge system of claim 1 including a third pocket located in
12 the middle of said mattress pad between each of said edges of said mattress pad.

13 3. The bed pad wedge system of claim 1 wherein each of said wedges has
14 the shape of an obtuse triangle.

15 4. The bed pad wedge system of claim 1, wherein each of said foam rubber
16 wedges is encased in a slippery material.

17 5. The bed wedge system of claim 4, wherein each end of said wedges
18 encased in said slippery material has means for closing said ends.

19 6. The bed pad wedge system of claim 1 including means for closing each
20 end of said casing.
